

FRIGA-BOHN®

NTA

Dual-discharge unit cooler
Commercial range

A2L

CO2 60bar

CO2 80bar

WG

HFC

|||| 0.9 - 22 kW

- # **Easy to install and use** as a result of its compactness, making it perfect for small spaces.
- # Easy access to all components for **easy cleaning** and **maintenance**.
- # **Comfort:** the directional airflow, the low air speed and the low noise level of the NTA help to create a comfortable environment.
- # **Energy efficiency:** with optimized performance, new refrigerants and the EC option, the NTA leads to real energy savings.

COILS

- # Aluminium fins with 3.5 or 6 mm spacing.
- # Combined with grooved copper tubes, the coils are very efficient and compact.
- # Multi-refrigerant CO2, A2L and HFCs compatible coils.
- # Versions available:
 - Multi-refrigerant HFCs/A2L,
 - CO2 (60 or 80 bar).
 - WCO (glycol water, coolant).

Select your coil treatment to extend
your unit cooler's lifespan!
Contact us.

VENTILATION

- # Bell mounted electric fans Ø 350 mm.
- # The AC motor fans are of the closed, single-phase capacitor type, 230V/1/50-60Hz, IP 55, class F, with internal thermal protection.
Available in version (depending on acceptable noise level):
 - HS (high speed) = 1,250 rpm. - 105 W max. / 0.5 A max.
 - LS (low speed) = 850 rpm. - 74 W max. / 0.45 A max.

OPTIONS

EC	EC motor fan - 4 speeds - 230V/1/50-60Hz.
EP	EC motor fan - 2 "boost" speeds (max air flow) - 230V/1/50-60Hz.
RCS	Blower heater. KIT TO INSTALL

CASING

- # Removable grille and retractable casing made from recyclable ABS.
- # High resistance to thermal shock.
- # Horizontal condensate drain plug 1" G with screw thread.
- # Perfect hygiene as a result of the rounded corners that eliminate retention areas and through the use of protected steel and stainless steel fastening screws.
- # Internal drain pans avoiding condensation on the casing.
- # Increased safety due to the absence of sharp edges.

OPTIONS

AFD

Deflectors to direct the air flow.

DEFROST

OPTIONS

E1U

Light electric defrost.

E1K

Light electric defrost. **KIT TO INSTALL**

2TH

TH 5709L: single-pole reversing thermostat for defrost end at +12 °C (±3 °C) and delayed ventilation restart at +2 °C (±3 °C) (kit to install).

THS 5708L: single-pole safety thermostat for heaters at +24 °C (±3 °C), recommended with electric defrost (kit to install).

OPTIONS

PRK

Condensate lift pump. **KIT TO INSTALL**

EXT

Electronic expansion valve fitted. **CONTACT US**

DMP

Expansion valve fitted.

EEC

Complete factory-assembled unit cooler:

- Expansion valve.
- Solenoid valve.
- Pipework equipped with a fitted ball valve (role of the siphon performed by the manifold).

KVP

Pressostatic valve kit. **KIT TO INSTALL**

Save time during installation by choosing these additional options.

NTA M_(A) OR_(B) 1_(C)-AC_(D)(A) M = multi-refrigerant - C = CO₂ - W = glycol water

(1) Standard conditions:

SC1 : +10 °C (air inlet temp.) / 0 °C (evaporating temp.) / DTM = 10K

SC2 : 0 °C (air inlet temp.) / -8 °C (evaporating temp.) / DTM = 8K

(2) Operating pressure - Specific coil - Connection diameters to be defined when ordering.

(3) Average sound pressure level in dB(A) calculated at 4 m, level with the blades, in a free field over a reflecting plane, given as an indication only.

NTA M_(A) OL_(B) 1_(C) EC_(D)

(A) M = multi-refrigerant - C = CO2 - W = glycol water

(B) Fin spacing: R = 3.5 mm - L = 6 mm

(C) Number of fans

(D) AC = AC motor - EC = EC4 motor - EP = EC3 motor

The NTA is available with CO₂, A2Ls, HFCs and glycol water. For more information, please consult our software.

(4) Residual air speed: 0.25 m/s.

(5) Adjustment of overload protection. For air temperatures "ti" other than +20 °C, multiply the intensities by the ratio 293/(273 + "ti") to obtain the approximate value of the intensity after heating the room.

(6) Electric defrost option.

(7) Distributor: male to solder

(8) Standard net weight - Specific net weight For CO₂ 80 bar: contact us.
